Experience You Can Trust

Protecting the world's information is our mission. Offering 45+ years of experience in data protection solutions and expertise in both disk and tape technologies, DSI meets the needs of IT professionals worldwide. DSI offers optimized solutions for data backup, recovery, and archiving. DSI has award winning designs, patented technologies, superior reliability, first class sales and support, and a variety of solutions customized to meet your needs.

Maximize Use of Valuable Resources

The DSI520 is designed to help you keep pace with your rapidly expanding business by utilizing state-of-the-art deduplication for your backup systems. There is no disruption as your capacity or performance needs change...simply add a license to your existing solution. Designed with growth in mind, the entire DSI520 Series can increase its storage capacity via 1TB repository licensing increments. There is no need to purchase more backup capacity than you need. Ever.

Protect Your Investment

Data security is imperative when building a backup and disaster recovery solution. DSI utilizes the industry's top standards for at-rest and in-flight encryption to ensure that your data is never exposed to outside threats. The DSI520 ships standard with in-flight and at-rest encryption so your data is protected every step of the way.

Maximize Your Data Center Efficiency

Data centers worldwide face the challenge of business critical data growing exponentially. DSI deduplicating backup systems provide scalable solutions that reduce power, management and space requirements. The DSI520 Series deduplication is designed for efficiency and allows your business to focus on growth without the worry of data management.

Build Your System, Your Way

The DSI520 Series provides scalable, enterprise-class data protection available for any environment.
